

Hevar Kochar

Website Developer / Software Engineer | E-commerce • Node.js • PostgreSQL • AWS/DevOps

Erbil, Iraq | 0750 353 1930 | hevarrwandzi@gmail.com | hevar.cloud | github.com/hevarrwandzi

PROFESSIONAL SUMMARY

Motivated Website Developer and Software Engineer focused on reliable e-commerce websites. I build responsive frontends, Node.js/Express backends, PostgreSQL data layers, APIs, Docker deployments, HTTPS/domain setup, backups, and production runbooks. Strong fit for roles needing someone who can develop, maintain, troubleshoot, and improve a growing web platform.

CORE SKILLS

Frontend: HTML5, CSS3, JavaScript, Responsive UI, Mobile-friendly pages, Performance basics

Backend: Node.js, Express, REST APIs, Admin routes, Authentication tokens, Debugging

Database: PostgreSQL, SQL schema, Seed data, Backups, DB health checks

E-commerce: Product catalog, Admin product management, Payment/API readiness, Security awareness

DevOps: AWS EC2, Docker Compose, Caddy HTTPS, DNS, GitHub Actions, Linux/SSH

Languages: English, Kurdish, Arabic

SELECTED PROJECTS

RS Collection — E-commerce Website

- Built and deployed a live online shop with product catalog, admin management routes, Node.js/Express backend, PostgreSQL database, Docker Compose, Caddy automatic HTTPS, Hostinger DNS, health checks, backups, and CI smoke tests.

- Live: <https://rscollection.online> | Repo: github.com/hevarrwandzi/rscollection

Hevar Cloud Portfolio

- Built and maintained a professional portfolio hosted on AWS S3 + CloudFront with GitHub Actions deployment, cache invalidation, custom domain, and project case studies.

- Live: <https://hevar.cloud>

Dr. Dilshad ECB Client Website

- Delivered a client website with custom domain, HTTPS, CloudFront CDN, locked S3 origin, and automated deployment pipeline.

- Live: <https://drdilshadecb.com>

EXPERIENCE

Freelance Website / IT / Cloud Builder — Erbil / Remote | 2025–Present

- Develop and deploy practical websites for portfolio and client use, including domain, SSL, hosting, and Git-based delivery.
- Troubleshoot website errors, DNS/SSL issues, Docker containers, server access, and production-style deployment problems.
- Create documentation, smoke checks, and backup/restore steps so websites are easier to maintain and hand off.

EDUCATION

- Computer Science / IT studies — Gasha Institute, Erbil (ongoing)
- Project-based training in web development, AWS, Docker, Linux, GitHub Actions, and deployment operations
